I turn enterprise people data into decisions, predictive intelligence, and measurable impact.

I lead People Analytics & Research at Elm Company, where I am building an AI-enabled People Lab that turns fragmented enterprise data into scalable intelligence for better decisions.

Across 20+ organizations in MENA, I have led AI-driven HR products, M&A integrations, culture and employee-experience transformations, and operating-model work. My focus is practical: connect the data, clarify the decision, and build systems that create measurable impact.

I am a certified PMP®, PMI-RMP®, and Prosci® practitioner, and I am completing an MBA at the University of Illinois Urbana-Champaign's Gies College of Business.
